Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/735,451	Applicant(s) FUERST ET AL.	
	Examiner Mathieu D. Vargot	Art Unit 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-9, 11 and 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 14 contain a recitation that the pattern is provided over a region of the target exceeding the perimeter of the contact lens to be formed. Yet there is no step of trimming the excess to make the lens as desired. Applicant should add a step of trimming the excess. Claim 13, at the end of step h, the word –and—should be inserted. In claims 13 and 14, while the step of “alternating...” has been deleted as being redundant to what has already been claimed, it is noted that the functionality of this step—ie, to prevent charge build-up-- was advanced as a major reason as to the success of the instant invention. Hence, it is submitted that this recitation should properly be put back into these claims in some manner for completeness. Claims 13 and 14, step h, last line, applicant should insert –desired—before “mean fibril distance”. Claim 14, the “and” at the end of step g should be deleted and placed at the end of step h. Claim 14, step I, line 1, the comma should be replaced with –and--. Claim 11, the Markush group language should be changed to – materials selected from the group consisting of collagen and HEMA— or written simply as –materials comprising collagen or HEMA--. As it stands, the language is an amalgamation of the two forms that has no set legal meaning.

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1791

While applicant has corrected most of the 112 issues, a few others were uncovered that need correction. Concerning the aspect of the alternating polarity removed from claims 13 and 14, it is believed that this aspect was important in achieving the instant contact lens formation and hence should properly be in the claims. Applicant can remove the recitation "of approximately 200 nm" in the last line of claim 14, step h, concerning the mean fibril distance.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
